

Wetlands Committee
Progress Report May 20, 2017

The Lake Timicau Restoration Project has finally started! The contractors are currently moving equipment and water control devices to the island. In order to finish by the June 30 deadline, the work will be performed by two separate crews. One will be working on six-pipes and one-pipe while the other will be working on extending the canal. Barring any weather delays the project should finish on time.

Respectfully submitted,
Faith Schwaibold, Chair, Richard deMayo, Lesa Kastler, Diane Kliros, Rick Miller, Carroll Savage, Tim Zitzman, Jim Decker, Kim Knight, Lori Sheridan-Wilson
